To the European Commission

Concerns: Commitment to the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers

Following the formal decision taken by the Management Board, Wrocław Research Centre EIT+ declares its commitment to the principles laid down in the Charter & Code. We believe that the development of an attractive, open and sustainable European labor market for researchers has a direct impact on our development as an organization.

Wrocław Research Centre EIT+ is a unique initiative undertaken in Poland, dedicated to fostering innovations based on the co-operation of academia, local government and innovative business.

We focus on the most promising research areas: biotechnology, medicine, nanotechnology and energy. We are constantly looking for research teams, we derive from the potential of Wrocław scientific community and we employ staff who gained experience in the best scientific centers in the world.

For Wrocław Research Centre EIT+, the principles and recommendations of the Charter & Code are the basic rules to support the work of researchers and to maintain high quality of scientific work. All recommendations applicable to our organization will be analyzed in terms of existing HR policies and adjusted where necessary to the guidelines of the European Commission.

Yours sincerely

Prof. Jerzy Langer
President of the Management Board
